

KANVAS

Designed by Alessandro Busana the Kanvas chair is a stylish contemporary, lightweight chair. Its sleek, lean design is inspired by the beauty of neoclassical sculptures and the modern two tone shell finish provides a subtle yet striking finish that will make the chair a design feature in any area. Designed with a beautiful sculpted back, the Kanvas has a gently controlled flex that moves with the user's bodyweight to provide comfort, even for extended periods.

The Kanvas chair is ideal for use in high-use applications such as breakout areas training and conference, auditoriums, educational and healthcare. Its fresh, modern profile is also attractive in a retail setting, cafeterias and recreational spaces.

The sled base allows the chair to be stackable up to 8 high and is also available in a wooden beech leg, tubular four leg, four star base on castors and in a bar height. The techno polymer shell is also available with upholstery.
